

Model: GP-SW011

AMAZWATCH ULTRA

MULTIFUNCTIONAL SMART WATCH

User Manual

Device maintenance

Please observe the following tips when using the smart watch:

- Do not forget to clean the smart watch, especially the inside, keep it dry.
- Adjust the tightness of the smartwatch on your wrist to allow air to circulate.
- Excessive application of creams, antiseptics and other skin care substances to the wrist before using the smart watch is prohibited.
- Please stop wearing the smart watch in case of allergy or discomfort.

Getting to know the clock

Note: Press and hold the power button to turn on the watch

Complete set:

- Clock
- Magnetic USB charger
- Removable silicone strap
- User manual with warranty card

Activation and charging of the watch

Before using the watch for the first time, it must be charged and activated. Using the magnetic charging cable, attach it to the metal charging slot on the back of the watch. The other end of the charging cable must be connected to the USB port of the charger.

Precautions:

- Please use the included charging cable and make sure that the charging contacts are dry before charging and do not have any other dirt or things that will interfere with charging the device.
- Connect the charging cable to a standard charger or USB port purchased through official representatives, which has received a product quality certificate and meets standard requirements.
- If the watch can't turn on after being left for a long time, when using it again, it needs to be charged first for about 2-3 minutes before the charging icon appears. Otherwise, contact the official service center or the place of purchase of the device.

1. Download and pair

- Press and hold the top "POWER" button to turn on the device.
- Scan the QR code below to install the free app «FitCloudPro», or download «FitCloudPro» from the App Store, Google Play, and then install it.
- Compatible system: Android 4.4 and above, iOS 8.0 and above.
- Open the «FitCloudPro» mobile application, select the device to be paired from the device list (GP-SW011).
- Turn on the mobile phone's Bluetooth and open the «FitCloudPro» APP, click "Add Device" to connect.
- Turn on the phone menu on the watch as shown in the picture. Then go to the mobile phone in the Bluetooth menu and connect (GP-SW011 Audio) in the device list. To use the functions of making and receiving incoming and outgoing calls.

2. Smart watch interface functions

1.6 Check the watch menu in the settings, the "About" item, the last four digits of the MAC address.

Then go to the mobile phone in the Bluetooth menu to search for the same name with the last four digits to complete the connection.

After the watch is successfully paired with the phone, every time the app is launched, the watch will automatically connect to the phone and the data can be synchronized by opening the «FitCloudPro» app.

1.1 Press and hold the top "POWER" button to turn on the device.

1.2 Scan the QR code below to install the free app «FitCloudPro», or download «FitCloudPro» from the App Store, Google Play, and then install it.

Compatible system: Android 4.4 and above, iOS 8.0 and above.

1.3 Open the «FitCloudPro» mobile application, select the device to be paired from the device list (GP-SW011).

Turn on the mobile phone's Bluetooth and open the «FitCloudPro» APP, click "Add Device" to connect.

Turn on the phone menu on the watch as shown in the picture. Then go to the mobile phone in the Bluetooth menu and connect (GP-SW011 Audio) in the device list. To use the functions of making and receiving incoming and outgoing calls.

3. Functions in the FitCloudPro application

Alarm clocks (3 options)

Find my smartwatch. Time formats, time setting. A reminder of a sedentary lifestyle. All-day heart rate monitoring. Viewing screen (select the screen operation interval). Reminder to drink water. A reminder of the physiological cycle. Setting Do Not Disturb.

(Notes: Please note that the above features work based on the respective settings being activated and saved)

4. Functions for interacting with artificial intelligence

Creation of personalized wallpapers

Selecting a wallpaper using artificial intelligence allows users to personalize their device in just a few simple steps. This feature is implemented in two ways: through the smartwatch voice assistant or through a smartphone app.

When the watch is connected to your phone, you can use it to dial a number to make a call, or you can answer calls from your phone on the watch. You can also view your call history. When using the call function, make sure that the watch is connected to the phone.

5. Smart watch functions

Alarm clock

Once the watch with the app is connected, you can set a single alarm and a cycle alarm.

Oxygen in the blood. Click on the oxygen interface to measure the blood oxygen content. More detailed analysis and data records can be viewed in the appendix.

Blood pressure. Click on the blood pressure interface to measure the current blood pressure value. More detailed analysis and data records can be viewed in the appendix.

Multifunctional sports modes. More than 100 sports disciplines and exercises are available in this feature. To set up your individual exercises, simply go to the menu and click on add an exercise, and choose from the available ones.

6. Smart watch functions

Activity information

The watch displays the activity you do throughout the day. Steps taken, calories burned and exercises done during the day. Step statistics for a certain period of time are also displayed.

Sleep. Your watch can record and record your total sleep duration, as well as the duration of your deep and light sleep. More detailed analysis and data records can be viewed in the appendix.

Music management. When connected, the watch can control a music player and other applications that play music or video.

Communication with AI. Ask questions and receive answers from artificial intelligence in real time. Get smart recommendations and quick responses directly on your wrist.

7. Smart watch functions
